TARGETED MUSCLE SUPPORT SPORT SPECIFIC COMPRESSION FOR PERFORMANCE AND RECOVERY

Our Muscle Containment Stamping (MCS) is our premium compression technology. The sport specific graduated compression is best in class for training and recovery; providing the optimal balance of compression power, flexibility and containment.

With a revolutionary fabric support system traced over key muscles, tendons and fascia groups with targeted compression technology to

wrap precise areas to further reduce muscle oscillation and damage. This highly advanced anatomical mapping provides greater compression power without excessive bulk in a light and highly breathable garment.

MCS RUN COMPRESSION TIGHTS

RECOMMENDED ACTIVITIES / RUNNING

Your run apparel is as important as your running shoes. The MCS Run Compression range has been developed with a detailed understanding of the impact running has on the leg. Providing anatomically mapped muscle support for greater performance and recovery.

GARMENT FEATURES

- MCS mapping targeted to quad and calf to help reduce strain and soreness to muscles
 - Thigh/Quadricep mapping** - reduce impact and dissipate the load transfer on the knee joint
 - Calf/Gastrocnemius mapping** - reduces muscle strain, especially during the toe phase of running and helps reduce ground reaction forces on the calf by reducing muscle oscillation
- Reflective logos for greater visibility
- Graduated compression
- Compression support to entire leg with PWX Flex 70D to front panels and PWX Weight 105D to back panels
- Rear zip pocket to keep essentials secure
- Flatlock seams to reduce chafing

FABRIC BENEFITS

- Lightweight yet powerful PWX fabrics
- Durable yarns that outlasts the competition
- Multi-directional stretch
- Flexible & breathable
- Moisture wicking yarns to help keep you dry
- UPF50+ sun protection
- Antibacterial

COMPRESSION BENEFITS

- Reduced muscle fatigue and soreness
- Reduced muscle damage and risk of overuse injuries
- Improved performance
- Improved muscle alignment
- Increased agility
- Faster recovery

SIZE RANGE	XXS, XS, S, ST, M, MT, L, LT, XL, XLT, XXL, XXLT, XXXL

MCS RUN COMPRESSION TIGHTS

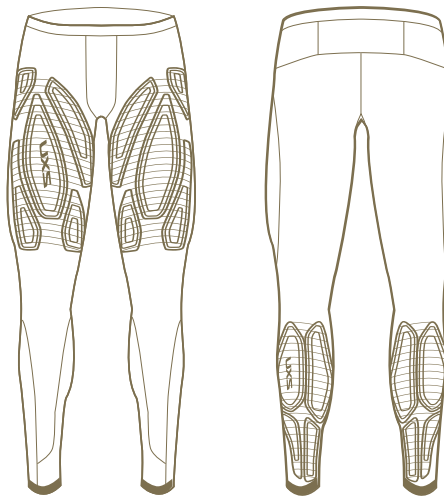

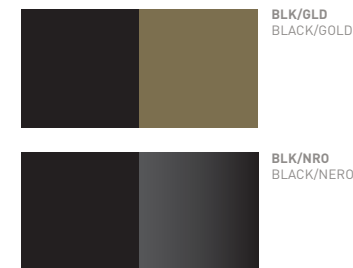

RECOMMENDED ACTIVITIES / RUNNING

TECHNICAL

MCS (MUSCLE CONTAINMENT STAMPING) is a revolutionary fabric support system traced over key muscle, tendon and fascia groups with targeted compression technology to wrap precise areas to further reduce muscle oscillation and damage. The advanced engineering provides greater compression power without excessive bulk. We understand the dynamics of movement can vary with strain and impact being placed on different muscles depending on activity. The **SPORTS SPECIFIC MCS COMPRESSION** ranges take a detailed understanding of each sport and targets **MCS** technology to the right muscles to transform your game.

RECOVERY

GTM TOOLKIT

THE REAL GAINS BEGIN NOW THE ULTIMATE RECOVERY TIGHT

2XU Recovery technology provides superior grade compression to stabilise muscles and promote increased blood flow for faster recovery and return to form.

Sports experts are uncovering huge gains by implementing smart recovery techniques and we've developed over foot graduated recovery compression that provides

greater power to further increase blood flow, create faster muscle repair and reduce swelling.

Proper recovery is essential to any training regimes to help prevent overuse injuries.

RECOVERY

VK: 139,90 €

ELITE POWER RECOVERY TIGHTS

RECOMMENDED ACTIVITIES RECOVERY FROM: STRENGTH TRAINING / BALL SPORTS
/ RUNNING

TECHNICAL

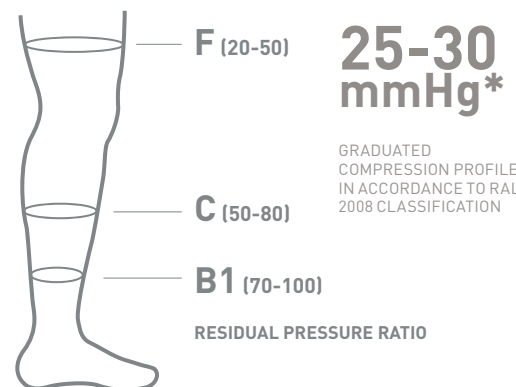

During training the body can be subject to explosive movements and strain on muscles that can leave you depleted and sore. **2XU** graduated compression increases venous return to the heart. This helps with the removal of blood lactate from muscles to return oxygenated blood to the body to help reduce swelling and speed muscle repair for faster recovery.

The ultimate compression tights for those wanting to get back to their peak in the fastest possible time. The tight provides over foot compression for rapid recovery. Engineered with powerful PWX 105D fabric combined with stamping technology to create greater power and graduated compression to help reduce muscle soreness and overall recovery time.

COMPRESSION SOCKS FOR RECOVERY

RECOMMENDED ACTIVITIES RECOVERY FROM: STRENGTH TRAINING / BALL SPORTS
/ RUNNING

The Compression Socks for Recovery offer powerful compression for faster recovery following intense activity. Graduated compression engineering to promote circulation through the lower limbs and improve venous return to relieve tired and sore muscles. Proper recovery is essential to any training regimes to help prevent overuse injuries.

GARMENT FEATURES

01. Graduated fit to promote increased blood flow and venous return to help muscle recovery
02. Padded zones to heels and balls of feet for maximum comfort
03. Seamless linked toe cage for greater comfort
04. Vented toe panel for greater breathability

FABRIC BENEFITS

01. Lightweight yet powerful PWX fabrics
02. Durable yarns that outlasts the competition
03. Multi-directional stretch
04. Flexible & breathable
05. Moisture wicking yarns to help keep you dry
06. UPF50+ sun protection
07. Antibacterial

COMPRESSION BENEFITS

- Faster recovery
- Reduced muscle stiffness
- Reduced soreness
- Reduced swelling

BRUSHED
BAMBOO
CHARCOAL

50%

WARMER THAN
STANDARD
COMPRESSION

IMPROVED
THERMO-
REGULATION

INSULATE AGAINST THE COLD ADVANCED THERMO-REGULATED COMPRESSION TECHNOLOGY

Bamboo charcoal fibre is the technical element in our new HEAT range to insulate against the cold. Providing all the benefits of our powerful compression, this new fabric is has superior moisture regulation, deodorising and antimicrobial functions due to the properties of bamboo charcoal. Bamboo charcoal produces negative ions. The negative ionic charge of bamboo charcoal combats odours and excess moisture, thereby leaving you feeling refreshed. Minus ions can

also relax muscular fatigue and cranial nerve to increase working efficiency.

Bamboo charcoal also emits far infrared rays that can promote better blood circulation. Similar to a sauna, the far infrared rays emitted by bamboo charcoal are said to be able to penetrate through your skin, dislodge toxins hiding there and stimulate the water molecules in their path thus promoting a better blood circulation.

HEAT COMPRESSION TIGHTS

RECOMMENDED ACTIVITIES / COLD WEATHER ACTIVITY

TECHNICAL

Bamboo is cut into small pieces, air-dried and then put them into vacuum furnace. The temperature of the furnace is kept at 850 degrees celsius for three weeks to turn into bamboo charcoal. The charcoal is then pulverised into nano particles and blended into Nylon fiber. The bamboo charcoal powder will not break away during the washing and wearing.

Bamboo charcoal fibers naturally generate oxygen ions that carry negative ions via micro frictions through rubbing with either the body or air. The bamboo charcoal also contains innumerable micro holes which can absorb foreign matters, diffuse negative ions and transport FIR. These properties make the bamboo charcoal fabrics dry quickly, keep skin fresh and comfortable.

The major characteristics of bamboo charcoal fiber as below:

1. STINK ELIMINATION

The bamboo charcoal has innumerable micropores with surface area of about 300m²/g (approx a 2/3 basketball court). The innumerable area can eliminate the unwanted odors instantly.

2. NEGATIVE IONS

Negative Ions can relax the muscular fatigue and cranial nerve increasing its working efficiency.

3. FAR INFRARED RAY

Far infrared ray possess function of thermal regulation, blood circulation enhancement and metabolism improvement.

COMPRESSION PERFORMANCE RUN SLEEVES

RECOMMENDED ACTIVITIES / RUN / TRI / TRAINING / BALL SPORTS

Repeated muscle vibration is directly related to causing fatigue, muscle damage and shin splints. These compression sleeves provide compression support to the calf to help reduce muscle oscillation for longer stronger performance. They feature zoned breathability panels for greater airflow and comfort. Gradient engineering for improved warm up and recovery.

GARMENT FEATURES

01. Compression support to calf and shin
02. Graduated Compression for improved warm up and recovery post exercise
03. Zoned breathability zones to shin and top of foot
04. Seamless construction throughout for greater comfort
05. Moisture wicking to keep you dry

FABRIC BENEFITS

01. Lightweight yet powerful PWX fabrics
02. Durable yarns that outlasts the competition
03. Multi-directional stretch
04. Flexible & breathable
05. Moisture wicking yarns to help keep you dry
06. UPF50+ sun protection

FLEX COMPRESSION RUN ARM SLEEVES (PAIR)

RECOMMENDED ACTIVITIES / RUN

The Compression Flex Run Arm Sleeves offers a versatile alternative to a long sleeve compression top. Easily pulled on and off, they can be used for warmup or for sun protection. Using a seamless construction throughout for greater comfort and flexible articulated elbow zone for greater freedom of movement. Powerful compression provides muscle support to reduce fatigue and a graduated profile provides faster recovery.

GARMENT FEATURES

01. Powerful compression support to forearm, elbow and biceps
02. Flexible articulated elbow for greater support
03. Graduated fit to promote faster muscle warm up pre exercise and recovery post exercise

FABRIC BENEFITS

01. Lightweight yet powerful PWX fabrics
02. Durable yarns that outlasts the competition

ELITE LITE X:LOCK COMPRESSION SOCKS

RECOMMENDED ACTIVITIES / RUN / TRI / ATHLETICS

The sock for those wanting a ultra light sock that is highly breathable. Olefin yarns are integrated for greature moisture management and durability. These light weight compression socks use X-lock technology for support to plantar fascia and protection from blisters. Powerful compression helps reduce muscle vibration and conditions such as shin splints. Graduated profile promotes greater recovery between workouts.

GARMENT FEATURES

01. X-LOCK technology supports the plantar fascia and holds foot in place and helps prevent blisters
02. Powerful compression support to calf, shin and tendons
03. Graduated compression starting at foot to the calf for greater venous return
04. Olefin Yarns for greater moisture management and durability
05. Anatomically engineered footbed with cushioned heel and forefoot for comfort
06. Linked seamless toe cage for added comfort

FABRIC BENEFITS

01. Lightweight and powerful PWX yarns
02. 200 Needle count knitted - lighter, denser and more durable
03. Multi-directional stretch

SIZING/FITTING GUIDE

M MEN

W WOMEN

// FABRIC GLOSSARY A-Z

// 105D/CK

Featuring 105 denier LYCRA® yarns for even greater power than 2XU's acclaimed 70D/CK, the 105D/CK is engineered to enhance performance like never before. Offering incredible stabilisation of the muscles, less vibration and fatigue, while moisture management properties keep the wearer dry, comfortable and focused.

// 70D LIGHT

Engineered with 70D creora® elastane for compressive support, this light weight fabric delivers high level breathability and moisture management.

// 70D/CK

Powerful, performance enhancing 70D LYCRA® offers impressive strength to increase endurance by containing the muscles to reduce fatigue. High filament, moisture wicking nylon yarns keep the athlete dry.

// ACTIVE LINING

For extreme moisture control through hot conditions, 2XU's ACTIVE LINING is built with polyester filament yarns to keep the wearer dry and chafe-free.

// DURA-MESH

A super durable, intelligent mesh specifically engineered for endurance focused garments. DURA-MESH delivers serious support while remaining breathable for comfort through the most extreme workouts.

// DURA-TECH

Delivering outstanding durability and breathability, DURA-TECH will withstand your toughest workouts. The fabric boasts sweat-wicking and antibacterial properties for total comfort from start to finish.

// FORM-TECH

This lightweight fabric offers premium softness and stretch for essential flexibility and comfort.

// FORMSOFT BRUSHED

Featuring an inner layer for extra warmth, this next generation fabric offers premium softness and stretch for essential flexibility and comfort.

// GHST

This light weight fabric offers superior breathability and cooling for maximum performance gains. With a revolutionary knit structure this fabric offers unrivalled moisture management.

// HI FIL

Utilising high filament technology, 2XU has engineered HI FIL for maximum moisture management. With ICE X embedded into the yarn, these cross-channelled yarns wick vapour from the inner to outer layers, keeping the wearer dry, comfortable and cool while a mesh structure ensures breathability.

// HIGH FIL 3D

Utilising a high filament polyester yarn with anti-bacterial protection. The 3d internal knit structure makes for a lightweight, cling resistant and supreme moisture wicking fabric to help you stay dry longer, for greater running performance.

// HI FIL EXTEND

Engineering 2XU's high filament technology with optimal flexibility for superior moisture management and comfort, while the mesh structure ensures breathability.

// HIGH FIL JACQ

Featuring a uniquely engineered jacquard to optimise moisture management and breathability, 2XU's HI FIL JACQ fabric is the ultimate in breathable technology to combat warm weather environments.

// HI FIL MESH

Utilising high filament technology, 2XU has engineered a performance fabric to maximise moisture management. Cross channelled yarns wick vapour from the inner to outer layers in order to keep the wearer as dry and comfortable as possible while a mesh structure promises breathability.

// ICE X

World-first cool touch nylon fabric, engineered with Xylitol to draw heat from the body, block harmful UV infrared rays and lower skin temperature by up to 3°C / 5.4°F. The ultimate solution for endurance events and warm weather demands, ICE X will keep athletes cool through the harshest conditions.

// INTERLOCK

Engineered with 40+40D Nylon and latest elastomeric fibres, this 2XU fabric delivers strength, power, flexibility and durability with superior hand feel. INTERLOCK is body sculpting, super flexible with impressive muscle support and definition.

// POWER MESH

High gauge and powerful yet light in weight, this impressive mesh offers superior flexibility and fabric memory for long lasting performance. Highly comfortable and form flattering.

// PRX 3D

Designed and tested for high wind conditions, PRX 3D is a compact 3D fabric, that minimises the passage of the airflow through the fibres between the fabric and the skin.

// FABRIC GLOSSARY A-Z

// PRX DRG 0

Delivering the ultimate in moisture management and aerodynamics. PRX DRG 0 features a Polyester fiber matrix, combined with high filament yarn offering the ultimate in airflow engineering.

// SBR SKIN LITE

Featuring low gauge 50D elastane with a high filament polyester yarn, 2XU's SBR SKIN LITE delivers essential support and moisture management.

// PWR FL-X

Engineered to provide a close yet comfortable body-hugging fit. This highly elastic and durable fabric is utilised in areas where flexibility is most needed.

// SBR LITE

Combining low gauge 50D elastane with high filament nylon yarn, 2XU's SBR LITE is engineered for light weight performance through high heat conditions. With outstanding moisture management and breathability, this intelligent fabric will keep the wearer's body temperature as cool as possible for maximum comfort through movement.

// PRX SKN

Engineered with hydrophobic yarns embedded into the fabric, this world-class PRX SKIN is our fastest fabric to date. With an extremely lowdrag coefficient and a high gauge knit structure, swimmers will enjoy greater muscle support, streamlined tracking and power output than ever before. PRX SKIN offers lightness and speed that is unparalleled.

// SBR POWER

Built from 70D elastane, SBR POWER offers unmatched power, durability and strength. Featuring high denier nylon yarn for impressive support and moisture management, plus a mid level gauge for stability, impressive muscle stabilisation through action is also assured.

// SBR SKIN X

Powerful 70D elastane for muscle support and enhanced performance. Excellent stretch and recovery memory to move with the body.

// SENSOR EXCEL

Featuring a 3D knit mesh structure, SENSOR EXCEL boasts superior hydrophobic properties to wick sweat from the skin through fabric to the outer elements for dry, chafe-free performance.

// SENSOR MESH

Utilising a nylon-LYCRA® fibre matrix with high filament hydrophilic nylon yarn and optimal airflow engineering, SENSOR MESH represents the ultimate in moisture management. With LYCRA® fibre from INVISTA, unparalleled comfort is assured.

// VAPOR

Featuring micro-filament polyester yarn with hydrophobic properties, this fabric offers supreme comfort and drape. A lower denier (finer) yarn on the outside wicks moisture from the higher denier (thicker) yarn on the inside to keep the wearer comfortable and dry. Zero cling to the body.

// VAPOR PRO

Extreme light weight technology built into a textured polyester fabric. VAPOR PRO boasts outstanding hydrophobic performance for premium moisture management and protection.

// VAPOR PROTECT

Engineered with hydrophobic properties, this fabric offers minimum weight with maximum protection.

// VAPOR STRETCH

Featuring micro-filament polyester yarn with hydrophobic properties, this fabric offers supreme stretch and comfort. A lower denier (finer) yarn on the outside wicks moisture from the higher denier (thicker) yarn on the inside to keep the wearer comfortable and dry. Moisture managing and zero cling to the body.

// VENT MESH

A high filament polyester-elastane matrix with jacquard mesh finish, 2XU's VENT MESH delivers maximum ventilation in a silky smooth finish for comfort. Outstanding breathability and moisture management is assured.

// X LITE LINING

Light weight with superior breathability, this brief liner keeps the wearer dry and comfortable through every workout.

// X LITE MEMBRANE

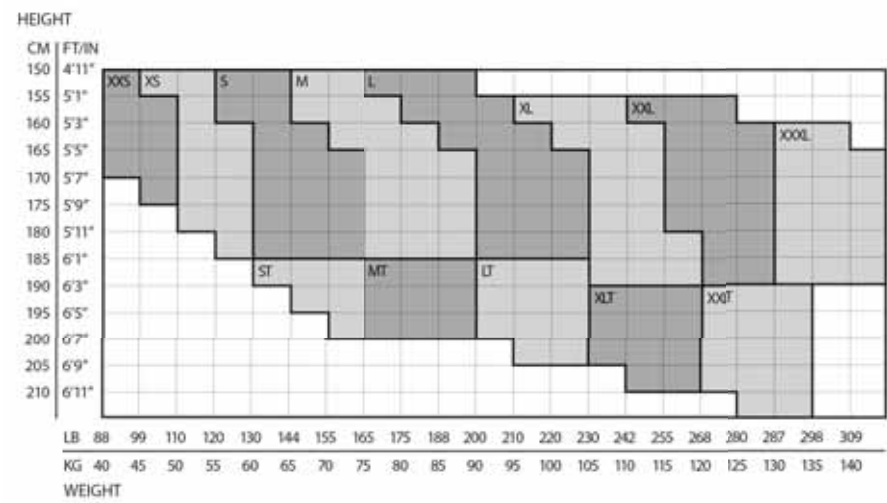

Weighing as little as 55gsm, this super light membrane fabric cannot be underestimated. Providing a powerful 10,000mm waterproof rating to keep the wearer dry.

// XTEND

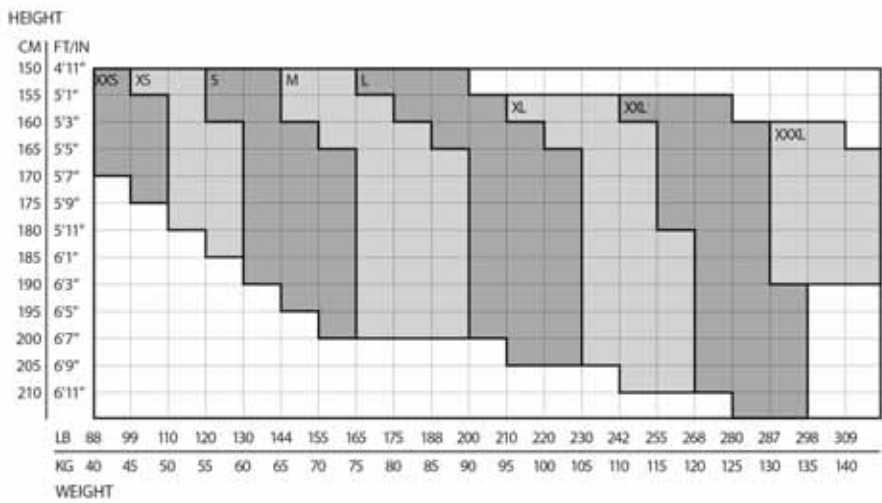

Representing proven fabric engineering, XTEND offers moisture management, flexibility and a soft finish.

XVENT LONG SLEEVE TOP

RECOMMENDED ACTIVITIES / RUNNING - ALL DISTANCES / TRAINING / ON RACE DAY
/ GENERAL CROSS TRAINING

Runners at every level need the support of highly technical apparel that allows them to focus on their times and their technique - XVENT styles are fully loaded with tech; moisture wicking, quick drying, actively cooling, with custom designed mesh panels for maximum ventilation whilst moving. This long sleeve top provides extra coverage for cooler weather layering, whilst still ensuring excellent moisture management, preserving the perfect microclimate around your torso.

GARMENT FEATURES

01. Premium moisture management
02. Unparalleled ventilation and breathability
03. Leading active cooling technology
04. Designed to meet run specific needs

FABRIC BENEFITS

01. High filament cross section yarns for the ultimate in moisture management
02. UV reflection and IR blocking to keep the fabric cool when out in the sun
03. Xylitol for instant cooling by up to 3 degrees on contact with skin
04. Uniquely engineered mesh panels to deliver targeted ventilation and breathability
05. Flat locked seams for minimised chafe
06. Antibacterial treatment for anti stink
07. UPF50+ sun protection

// FABRIC GLOSSARY A-Z

// PRX DRG 0

Delivering the ultimate in moisture management and aerodynamics. PRX DRG 0 features a Polyester fiber matrix, combined with high filament yarn offering the ultimate in airflow engineering.

// SBR SKIN LITE

Featuring low gauge 50D elastane with a high filament polyester yarn, 2XU's SBR SKIN LITE delivers essential support and moisture management.

// PWR FL-X

Engineered to provide a close yet comfortable body-hugging fit. This highly elastic and durable fabric is utilised in areas where flexibility is most needed.

// SBR LITE

Combining low gauge 50D elastane with high filament nylon yarn, 2XU's SBR LITE is engineered for light weight performance through high heat conditions. With outstanding moisture management and breathability, this intelligent fabric will keep the wearer's body temperature as cool as possible for maximum comfort through movement.

// PRX SKN

Engineered with hydrophobic yarns embedded into the fabric, this world-class PRX SKIN is our fastest fabric to date. With an extremely lowdrag coefficient and a high gauge knit structure, swimmers will enjoy greater muscle support, streamlined tracking and power output than ever before. PRX SKIN offers lightness and speed that is unparalleled.

// SBR POWER

Built from 70D elastane, SBR POWER offers unmatched power, durability and strength. Featuring high denier nylon yarn for impressive support and moisture management, plus a mid level gauge for stability, impressive muscle stabilisation through action is also assured.

// SBR SKIN X

Powerful 70D elastane for muscle support and enhanced performance. Excellent stretch and recovery memory to move with the body.

// SENSOR EXCEL

Featuring a 3D knit mesh structure, SENSOR EXCEL boasts superior hydrophobic properties to wick sweat from the skin through fabric to the outer elements for dry, chafe-free performance.

// SENSOR MESH

Utilising a nylon-LYCRA® fibre matrix with high filament hydrophilic nylon yarn and optimal airflow engineering, SENSOR MESH represents the ultimate in moisture management. With LYCRA® fibre from INVISTA, unparalleled comfort is assured.

// VAPOR

Featuring micro-filament polyester yarn with hydrophobic properties, this fabric offers supreme comfort and drape. A lower denier (finer) yarn on the outside wicks moisture from the higher denier (thicker) yarn on the inside to keep the wearer comfortable and dry. Zero cling to the body.

// VAPOR PRO

Extreme light weight technology built into a textured polyester fabric. VAPOR PRO boasts outstanding hydrophobic performance for premium moisture management and protection.

// VAPOR PROTECT

Engineered with hydrophobic properties, this fabric offers minimum weight with maximum protection.

// VAPOR STRETCH

Featuring micro-filament polyester yarn with hydrophobic properties, this fabric offers supreme stretch and comfort. A lower denier (finer) yarn on the outside wicks moisture from the higher denier (thicker) yarn on the inside to keep the wearer comfortable and dry. Moisture managing and zero cling to the body.

// VENT MESH

A high filament polyester-elastane matrix with jacquard mesh finish, 2XU's VENT MESH delivers maximum ventilation in a silky smooth finish for comfort. Outstanding breathability and moisture management is assured.

// X LITE LINING

Light weight with superior breathability, this brief liner keeps the wearer dry and comfortable through every workout.

// X LITE MEMBRANE

Weighing as little as 55gsm, this super light membrane fabric cannot be underestimated. Providing a powerful 10,000mm waterproof rating to keep the wearer dry.

// XTEND

Representing proven fabric engineering, XTEND offers moisture management, flexibility and a soft finish.
